

ST400 ALFALFA

PERFORMANCE TRAITS

- Salt Tolerant Variety Bred and Developed for Soils and Irrigation Water With Higher EC Levels
- Enhanced Germination and Forage Salinity Tolerance
- Highly Resistant to Stem and Northern Root Knot Nematodes
- Good Traffic and Drought Tolerance for Longer Stand Life
- Solid Yield and Forage Quality Potential Where Other Varieties Fail to Perform
- Branch-Root Trait Increases Production in Wetter Soil Types and Higher Water Tables

AGRONOMICS

1-5

Fall Dormancy	4.0
Winter Survival	2.0
Fast Growth Rating	4.0
Yield Rating	4.5
Forage Quality	4.5

Disease & Pest Resistance Package	HR	R	MR	LR	S
Diseases					
Anthracnose		✓			
Aphanomyces-Race 1		✓			
Bacterial Wilt	✓				
Fusarium Wilt	✓
